Assignment 1: Cultural Heritage by the Numbers

## Introduction to Digital Humanities S24
Linus, Liz

Project Summary: Analyzing data obtained through both the HAM website and the CSV derived from the HAM API.

Process:
- Analyzed the piece "Chicken Noodle soup", based on data provided by website and CSV
- Theorized least and most viewed pieces within the "Korean" category
- Created Word clouds based on the description of the 3 most popular east asian cultures based on the CSV

Conclusions:
- Noted the various pros and cons of using both the HAM website and the CSV
- Understand the reasons for the lack of views for a particular piece
- Word cloud provided a view of the recurring theme for each culture, for example, architecture and ceramic art for Korean culture
